

What We Do

 Perpetuate a clean and healthy water supply for humans and wildlife by protecting wetlands and by preserving and promoting natural corridors between the Wenrick and Honey Creek Wetlands with a greenway link in the Greater Dayton Greenbelt.

 Protect and represent the community's interests with suitable residential and industrial development.

 Gain protection of land that has conservation value for community enjoyment and for wildlife habitat through the use of grants and by providing education to residents about conservation easements.

 Foster sustainable land use principles through education and technical assistance encouraging sustainable agriculture practices and preserving the rural character of Bethel Township.

 Cultivate a "sense of place" based on respect for our natural, cultural, and historic environment.

W-H GREENWAY COMMUNITY

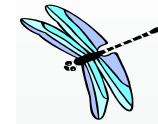

"The mission of the W-H Greenway Community is to promote sustainable land use while balancing human and wildlife needs by connecting the Wenrick Wetlands and Honey Creek Wetlands with a greenway."

Are You on the Map?

We are a group of citizens who value our community's rural character and natural resources. We want to be involved in deciding how our community develops economically and as a neighborhood. If you are on this map we invite you to get involved and participate in helping our community to become connected, strong and healthy!
